Subject: Approval and Continuation of Project Title

This letter is to confirm that the project titled “**LANET (Language Network)**” is an extensive and ongoing work with significant scope beyond a single academic year. The project focuses on developing an **AI-powered Ethiopian language learning platform** designed to enhance language acquisition through conversation practice, listening, reading, writing, social interaction, and intelligent progress tracking.

Given its wide scope, technical depth, and practical relevance, the continuation of this project under the same title for subsequent phases is appropriate and academically valuable. The project demonstrates strong potential to support digital education innovation, improve access to Ethiopian language learning, and contribute to real-world technological solutions.

Therefore, approval is granted for the student(s) to proceed with the **second phase of the project using the same title, “LANET (Language Network).”**
